

The screenshot displays the n8n workflow editor interface. At the top, there are buttons for 'Inactive', 'Share', 'Saved', and a menu icon. On the right, there are 'Star' and '156,480' indicators. The main workspace shows a workflow with the following steps:

- Schedule Trigger**: The starting point of the workflow.
- RSS Read**: A node that reads RSS feeds, connected to the Schedule Trigger.
- RSS Read1** and **RSS Read2**: Two additional RSS feed nodes, each connected to the Schedule Trigger.
- Merge**: A node that combines the outputs of the RSS feed nodes. It has three input ports labeled 'Input 1', 'Input 2', and 'Input 3'.
- AI Agent**: A node that processes the merged data. It is connected to the Merge node and has a 'Chat Model' input port.
- OpenAI Chat Model**: A node that provides the chat model for the AI Agent.
- Telegram**: A node that sends the output of the AI Agent to a Telegram channel.

The workflow is titled 'Test workflow' and is currently in the 'Inactive' state.
